

M-SERIES IGNITION MODULE AND ELECTRODE CHANGES

Part# 200631K, 200802K

Introducing

M-Series Ignition Module and Ignition Electrode Kits.

Part Numbers

The following table defines the old and new part numbers.

Description	Obsolete PID	New PID
Ignition Electrode Only	200801K	200802K
Ignition Module and Electrode Kit	200751K	200631K

Updates

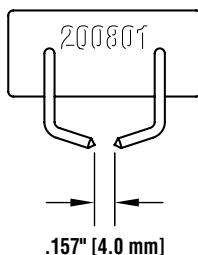

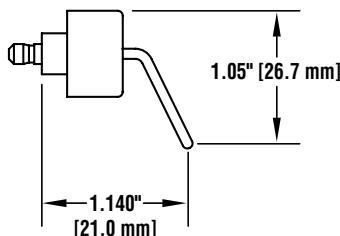

- Electrode tips positioned away from the nozzle orifice to prevent contamination due to raw fuel exposure.
- Improved service life.
- Ignition Module Kit 200631K includes the 200802 Ignition Electrode.

Identification

The diagrams below show the three different types of electrodes, their application, and their dimensional specifications.

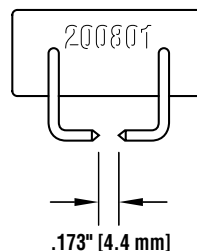

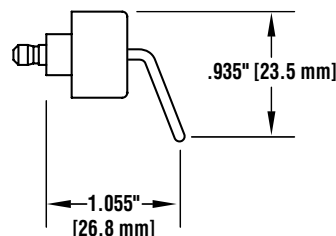

FOR VANE COMPRESSORS ONLY

Ignition Electrode **200801**
(Use with Heater S/N's beginning with 500000 and 600000 **ONLY**)

FOR ALL DIAPHRAGM AND VANE STYLE COMPRESSORS

Ignition Electrode **200801-1**
(Use with **ALL** Heater S/N's)

Ignition Electrode **200802**
(Use with **ALL** Heater S/N's)
